

## **REPORTS FOR PC MEETING 19<sup>TH</sup> OCTOBER 2022**

### DEFIBRILLATOR

I have confirmed that The British Heart Foundation will fund a defibrillator including installation with just a £600.00 contribution from the PC.

No firm commitment can be made on this until I can confirm to BHF that we have permission from the owner(s) of the proposed site which is on the base of the long since removed phone box in Annings Lane and is adjacent to the post box. This area is considered ideal in terms of it's accessibility and is set back from the pavement in a recess bounded by the garden wall of no.5 South Annings.

At present I am waiting for confirmation/permission from either Dorset Highways or Magna Housing as to who owns this 1m x 1m (approx..) area.

The next question will have to go to Western Power about a mains electricity supply which hopefully can tap into the one which powered the lighting in the old phone box. The positive here is that there is already a mains supply on the electric pole alongside the proposed site.

I will keep progressing this in order to have all the answers required for installation and servicing before the next meeting.

### APPLE PRESSING EQUIPMENT

Having loaned the equipment for ex. Cllr Steve Meek's recent apple pressing, I have now got everything stored at Graston Farm, mainly because it really is a hazardous task to carry the press up and down the stairs in the Reading Room.

I therefore propose that I keep the equipment here permanently, in a safe accessible place and where it would also be covered by my insurance as well. Should it be needed for any future village event, I am happy to deliver it to site as required and should any Parishioner wish to use it they could so ,with permission from the PC, as long as it was returned fully operational and cleaned.
